- \$GMC - is gm wagmi classic cryptocurrency (next \$GMC).
- Nothing in \$GMC or the Site constitutes professional and/or financial advice, nor does any information on the Site constitute a comprehensive or complete statement of the matters discussed or the law relating thereto.

We do not intend to offend anyone with this letter ●
Any coincidences, speech turns
do not carry any ambiguous information.

gmc intro

gmc

- GMC is a ERC20 that represents the collective ambition of all things crypto. The community supports the WAGMI ideology, which is an acronym for

"We are all going to make it".

-
-
-
-

GMC can grow into anything. That's the power of WAGMI. WAGMI is the collective hope of all our holders that there's a chance for them to make it, too.

Some here are already whales. They are welcome. But this project is designed for those who aren't. Our renounced contract offers USDC reflections so as to give all holders some stability, even in an unstable world, forever.

gmc utility

Regarding utility, we plan to expand the \$gmc ecosystem into tools that help our holders make it.

To start, we are building a decentralized dapp with token-gated features to track wallets and GMC reflections, check contract safety, decentralized community-voted token listing, and even Caller Blogging.

The goal for GMC is to also make it easier for safe dedicated project teams to get the exposure they deserve by using an On-Chain mechanisms.

Where "CoinMarketCap"
chooses to ignore safe projects
based on subjective criteria;
\$GMC will make it a priority to give
these communities exposure and attention.

WAGMI.

A pie chart illustrating the distribution of tokens. The chart is divided into two segments: a large white segment representing 'Total Supply' at 80%, and a smaller blue segment representing 'Burned Dev Tokens' at 20%. A dashed line connects the blue segment to a separate box on the right.

Category	Percentage
Total Supply	80%
Burned Dev Tokens	20%

\$GMC employs 3 simple functions:

- Reflections in stable USDC coins for every interaction with \$GMC
- Claiming USDC rewards additional to reflections, which holders can get from dApp
- Tracking system according on safe CoinGecko + CoinMarketCap API protocol.

Safety

Step-by-step plan to ensure 100% safety

Step 1

**Burn 25% tokens
Renounce
of Contract
Prior to Launch**

Step 2

**Fair launch
on Dextools**

Step 3

**LP lock
LP reLock**

Step 4

**Contract Audit
USDC Reflections**

GMC dApp

A decentralised application (dApp) is an application that can operate autonomously, typically through the use of smart contracts (GMC smartcontract), that runs on a decentralized computing, blockchain or other distributed ledger system.

What i can do on GMC dApp?

GMG dApp is handy utility that works offline.
It was decided to make early access open to everyone for the transparency of the project.
Any client with a crypto wallet can use the application at no additional cost.

GMC dApp

Tracking of tokens that have been audited and listed on
Coingecko and CoinMarketCap trackers.
In case of delisting, you will also be able to see it on our website.

By clicking on any token, you can see
the information about the pair:

- biography of token pair
- marketcap
- volume changes
- rank (according to CG API)

gmc outro

gmc

Finally, GMC is a homage to the original \$gm project but with improved tokenomics for holders.

This was a community with hope and promise that somehow fell short.

GMC is here to pick up the torch for a new generation of dreams.
